Macroeconometrics
Microeconometrics (panel data)
Firm level microdata analysis
Computational methods
Forecasting and policy scenarios

Anup Mulay

Principal Economist, Lietuvos bankas

Applied Macroeconomic Research Division | Vilnius, Lithuania

ABOUT ME

I am a Principal Economist in the Applied Macroeconomic Research Division at Lietuvos bankas, where I specialise in structural and semistructural macroeconomic modelling and its application to policy analysis.

WORK EXPERIENCE

Principal Economist
02/2025 – Current

Lietuvos bankas | Vilnius, Lithuania

- Responsible for developing several of the Bank's core macroeconomic models.
- Lead the Bank's policy scenario work, from designing scenarios to delivering results, on a wide range of macroeconomic questions, from external shocks such as commodity price swings to fiscal policy and structural reforms.
- Hold ownership of, and responsibility for, policy analysis and model development tasks in the division.
- Independently built E-LITMAS, the version of LITMAS the Bank uses for energy and climate policy, with a full energy sector that models fossil fuels alongside green and brown energy production, and used it for energy price shock and climate transition scenarios for the Baltic economies.
- Continue to develop, estimate and update LITMAS jointly with Stefan Girstmair.
- Maintain, update and modify NMCM, the Bank's primary semistructural forecasting tool. NMCM and LITMAS feed into the Bank's regular forecasting rounds.

Senior Economist
10/2021 – 02/2025

Lietuvos bankas | Vilnius, Lithuania

- Built LITMAS (LIThuanian Model for Analysis of Scenarios), a large scale estimated DSGE model, jointly with Stefan Girstmair, and estimated, modified and updated it.
- Started development of E-LITMAS, the energy sector extension of LITMAS.
- Maintained, updated and modified NMCM, the Bank's primary semistructural forecasting tool, as input to the Bank's regular forecasting rounds.
- Contributed to the Bank's policy scenario work as a member of the scenario team.

Lecturer
Spring 2023, 2025, 2026

Vilnius University, Faculty of Economics and Business | Vilnius, Lithuania

Taught Economic Theory II, a second year bachelor's course in intermediate macroeconomics.

Postdoctoral Researcher
03/2021 – 10/2021

University of Kent | Canterbury, United Kingdom

Investigated trends in market power and their relationship with aggregate productivity using UK Data Service Business Microdata (extensive microeconometric and panel data analysis in Stata and R), with the objective of building structural models to explain these phenomena and generate policy implications.

Teaching Assistant
09/2015 – 12/2019

University of Kent | Canterbury, United Kingdom

- **EC562 Financial Economics:** martingale option pricing, the HJB method for option pricing, the binomial model (algebra and MATLAB), interest rate models, Monte Carlo simulations and binomial asset pricing in MATLAB and Excel.
- **EC534 Money and Banking:** theoretical models of money and monetary policy (core text: Champ, Freeman and Haslag, 4th edition).
- **EC314 Data Analysis:** linear programming in Excel, downloading data, HP filtering, regression analysis and report generation.

Research Assistant

University of Kent | Canterbury, UK 04/2019 – 08/2019

- Research assistant to Dr Anthony Savagar.
- Replicated the DSGE model of Jaimovich and Floetotto (2008) in MATLAB.

National Institute of Economic and Social Research | London, UK 07/2017 – 11/2017

- Transferred and rewrote the code of a nowcasting model producing quarterly estimates of economic variables from an older version of MATLAB to the current version, with modifications.
- Data cleaning and analysis in Python.

Researcher 01/2015 – 03/2015

Bridge2Tech Pvt Ltd | Pune, India

Analysed the investment potential of countries in terms of fiscal and monetary policy and their medium and long term outlook.

Article Trainee (Chartered Accountancy) 05/2004 – 07/2008

S.S. Mulay and Co., Chartered Accountants | Pune, India

Mandatory article clerk training for the Chartered Accountant qualification: auditing, accounting, report generation and tax return filing.

EDUCATION AND TRAINING

PhD in Economics 2015 – 2020

University of Kent | Canterbury, United Kingdom

Research on financial frictions and their effect on measured aggregate productivity.

Graduate studies in Economics 2013 – 2014

Boston College | Boston, United States

Also worked as a research assistant during the year.

Master's degree in Economics 2011 – 2012

University of Nottingham | Nottingham, United Kingdom

Master's degree in Investments and Securities 2009 – 2010

London South Bank University | London, United Kingdom

Chartered Accountant, Accounting and Finance 2004 – 2008

The Institute of Chartered Accountants of India | India

PUBLICATIONS

An Ex-Ante Assessment of the Proposal to Reform the Second Pillar of the Lithuanian Pension System

With Karolis Bielskis, Federica Brenna, Jose Garcia-Louzao and Stefan Girstmair. Lietuvos bankas Occasional Paper No. 57/2025. Link

WORK IN PROGRESS

Capital Portfolio, Collateral Constraints and the Measured Efficiency Wedge

With Alfred Duncan. SSRN

An E-DSGE for the Baltics

With Patrick Grüning.

The Welfare Costs of Distortions with Imperfectly Contestable Markets

With Anthony Savagar.

PROJECTS

The Demography of Currency Unions

With Swapnil Singh. A two country HANK OLG model of a currency union whose members age at different rates, combining an exact demographic transition with a structural general equilibrium block to study how this heterogeneity shapes monetary policy transmission.
